

‘LAURA H’ ADDENDUM CLASS NOTATIONS

HULL

+ 100 A5

The additional class notation **+100A5** is assigned when the ship's hull fully (100 %) complies with the requirements of the GL Construction Rules. Duration of class period 5 years.

Navigation in ICE (E)

The additional class notation **E** is assigned for Ice class for ships the hull and machinery installations of which are strengthened for navigation in drift ice in mouths of rivers and coastal regions according to GL's Construction Rules. The Notation **E** may be assigned independently for hull or machinery.

Enhanced Survey Programme (ESP)

The additional class notation **ESP** is assigned when the ship's hull (cargo area) will be surveyed according to an enhanced survey programme.

Emergency Response Service (ERS)

The additional class notation **ERS** is assigned when the ship data are made available in a database to provide the assistance necessary for limiting damages in case of average with the aid of special computer programs

MACHINERY

MCE - The Machinery and all Installations including all Electrical Installations comply with the requirements of the GL Construction Rules. The Notation **E** – Ice strengthening

Unattended Machinery Spaces (AUT)

AUT - The machinery installation is fitted with equipment for unattended machinery spaces, so that it does not require to be operated and/or maintained for periods of at least 24 hours.

Redundant Propulsion and Steering (RP1-50%)

RP1-50% - Redundant Propulsion system with 2 independent propulsion machines. The additional index **50%** denotes what percentage of the main propulsion power of the ship is provided by the redundant ship's propulsion system.
